

PROFESSIONAL ARBORIST CHAIN SAWS

MS 191T

Now with more power. Combines value and performance in a light-weight, compact chain saw. The MS 191T has 11% more power than the 019T, plus excellent balance and a retractable carrying ring. Exclusive curved side handle allows tree trimmer to operate saw in various positions.

MS 200T

The Ultimate Arborist Saw. The MS 200T is extremely well balanced with the same durability and a narrower profile than the legendary 020S and 24% lighter. Other performance features include a side-access chain tensioner, Master Control Lever™, adjustable oiler, STIHL Quickstop® chain brake and retractable carry ring.

Lanyards

10" loop strap with either brass clip or 2" ring.

MS 191T, MS 200T WARNING!

Due to the special compact handle design (closely spaced handles), there is an increased risk of injury from loss of control. (Cut injuries due to uncontrolled reactive forces of the chain saw or leg injuries due to the saw "dropping" at the end of the cut.)

For this reason these special chain saws should be used only for work in the tree by persons trained in special cutting and working techniques and who are properly secured (lift bucket, ropes, safety harness).

“Climbing trees is second nature. So is carrying STIHL.”

– Mark Chisholm, Professional Arborist and two-time ISA International Tree Climbing Champion

As a 3rd generation arborist, Mark knows what it takes to bring down a tree. As a world champion tree climber, he also knows what it takes to get up one. That's why he prefers the STIHL MS 200T. It's lightweight, powerful and designed for use up in trees. As Mark says, "Working in trees near power lines and homes isn't easy and can be dangerous. So you better believe I want the best saw of its kind up there with me."
