

PROFESSIONAL CHAIN SAWS: THE MAGNUM SERIES

MS 440 STIHL Magnum™

One of the world's largest-selling professional saws. Powerful, all-around model for felling and bucking, the MS 440's smooth contours also make it a great limbing saw. Available in STIHL Arctic™ version. IntelliCarb™ lets you cut longer between filter cleanings.

MS 460 STIHL Magnum™

The MS 460 is a tough, high-performance saw that's easy to use and maintain. Has more engine power and more torque than the MS 440, yet weighs only 14.4 lbs. New lightweight flywheel makes limbing easier. Optimized anti-vibration system and decompression valve ensure quicker starts and smoother operation. Available in STIHL Arctic™ version.

MS 660 STIHL Magnum™

Designed for heavy-duty cutting in big timber, the MS 660M combines high power with low weight. Available in wraparound or flushcut handle configurations. Decompression valve makes starting easier and IntelliCarb™ helps keep the saw running at full RPM.

088 STIHL Magnum™

STIHL's most powerful professional saw. Precision-balanced to provide excellent handling and reliability under the most strenuous cutting conditions. Other features include a lightweight flywheel and a dry, easy-to-maintain air filter. Includes decompression valve for easier starting.

STIHL Arctic™

chain saws are built with an automatic, electrically heated carburetor to help prevent icing in severe weather. STIHL Arctic™ versions also feature electrically heated handles that you can turn on and off for comfort.
